

Attachment 1
Massachusetts Program Service Numbers by MCH Categories, FY22

Program Name	Number of Individuals Served in FY22 by MCHB Population
Adolescent Sexuality Education	3,683 children (ages 1-22)
Birth Defects Monitoring Program	4,538 infants (completed case forms on infants or fetuses with a diagnosed birth defect)
Birth Defects Study To Evaluate Pregnancy exposureS (BD-STEPS)	96 ¹ other individuals: completed telephone interviews among control/birthing persons who had a liveborn infant with no birth defect or case/birthing persons who had an infant with one of the 23 eligible birth defects
Care Coordination (including SSI-DP recipients)	1,045 children with special health care needs (SHCN) – care coordination clients (including 19 infants) other individuals: 499 - technical assistance phone calls (112 from family members); most parent calls screened for Medicaid eligibility 417 - attendees at 37 training sessions (277 parents and 140 providers) 137 - families supported to attend state conferences
Catastrophic Illness in Children Relief Fund	160 children with SHCN & their families (financial assistance provided) (including 4 infants)
Center for Unexpected Infant and Child Death	other individuals: 36 - families and significant others who have lost infants from SIDS, SUID, fetal demise, stillbirth or other causes – in individual and family counseling (new referrals) 400 - families receiving ongoing services (incl. counseling calls, bereavement home visits, peer support contacts, and mailings) 275 - participants in educational programs (e.g. safe sleep training, Walk to Remember) 500 - individuals reached through risk-reduction activities (e.g. state and local child fatality review meetings, advisory board meetings)

¹ This number is lower than in previous years because there was a pause in interviewing between mid-March 2022 and mid-July 2022. This number reflects interviews conducted during 07/01/2021-03/16/2022.

Attachment 1 Table
Massachusetts Program Service Numbers by MCH Categories, FY22

Childhood Lead Poisoning Prevention Program	27,231	infants 0-11 months (most in primary care system)
	851	children with SHCN (blood lead levels $\geq 10 \mu\text{g/dL}$, under case management), including infants 0-71 months
	190,719	children (<6 yrs): screening; includes CSHCN shown above (monitored by MCH-funded contracts)
Community Support Line		other individuals (through TA phone calls)
	221	- parents of CSHCN
	404	- providers
	141	- others
	37	parent attendees at 3 training sessions
Critical Congenital Heart Defect Pulse Oximetry Screening <i>(voluntary reporting)</i>	10,258	infants (newborns in well-newborn and special care nurseries for whom discharge is expected in first week of life)
Early Intervention Parenting Partnerships Program (EIPP)	90	pregnant women
	383	infants (all referred to EI)
	376	other individuals: postpartum women
Early Intervention Services	3,791	infants (assessment services only)
	41,811	children with SHCN (including 15,684 infants) and their families, including 680 with EI Specialty Services (including 236 infants)
	7,098	children (ages 1-2; assessment services only)
Essentials for Childhood		other individuals
	125	- people participating in annual Summit and Awards events

Communities Experiencing Inequities**

1,396 - adult & adolescent survivors
53 - clients of another relationship to a survivor

Supervised Visitation Services

1,125 - adult & adolescent survivors
327 - children of survivors (children exposed to IPV)
295 - offending parents (parents who have abused the
non-offending parent)
173 - clients of another relationship to a survivor

**Massachusetts Maternal, Infant,
and Early Childhood Home
Visiting (MA MIECHV), including
Welcome Family**

304 pregnant women
2,904 infants (<1 year)
992 children (ages 1-6)
other individuals:
2,825 - postpartum women
81 - male caregivers

**Massachusetts Poison Control
Center**

1,519 infants
19,022 children (ages 1-22) including direct outreach to 61
children
9,102 other individuals (adults & people of unknown age)

Attachment 1 Table
Massachusetts Program Service Numbers by MCH Categories, FY22

Massachusetts Pregnant and Parenting Teen Initiative (MPPTI)	89	pregnant adolescents (14-24)
	70	infants
	572	children age 1-10
	316	parenting adolescents (ages 14-24)
MassCARE (Mass. Community AIDS Resource Enhancement)	8	pregnant women (including adolescents)
	26	children with SHCN (age 18 and younger), including 2 infants
		other individuals:
	99	- case managed clients (over age 18)
	9	- adults and adolescents at risk – health education events and group activities
		parents/consumers
	9	- attending trainings through consumer meetings and activities
MASSTART (Mass. Technology Assistance Resource Team)	1	- paid positions
	248	children with SHCN served
	138	children with SHCN – new referrals
	93	other individuals: health care professionals, teachers, other human service professionals (TA encounters)
	388	other individuals: health care professionals, teachers, other human service professionals (trainings)
Maternal Mortality and Morbidity Review	16	committee members
	2	review meetings
	14	deaths reviewed
Medical Review Team	61	reviews
	57	children and youth with SHCN screened for skilled facility placement.
		certified for placement:
	17	- long-term
	39	- short-term (respite) (8 new referrals)
	1	- short-term (rehabilitation) (ages 18-22)
Metabolic Food and Formula Program	0	- post-hospital
	45	children with SHCN (PKU and related metabolic conditions) (ages 0-18) received special PKU formula and/or foods
	29	other individuals: adults (ages 19-68)
Neonatal Abstinence Syndrome Pilot Surveillance System	730	infants born between 7/1/21 and 6/30/22 with NAS, whose medical records were abstracted for NAS surveillance and collection of individual level data
Pediatric Palliative Care		children with SHCN:
	222	- referred for services

Attachment 1 Table
Massachusetts Program Service Numbers by MCH Categories, FY22

	701	- receiving palliative care services (including 47 infants)
Perinatal Neonatal Quality Improvement Network (PNQIN)		others (hospitals):
	41	- participated in the Perinatal Opioid Initiative (perinatal and pediatric)
	15	- trained in stigma, bias, and trauma-informed care
	35	- participated in equity (SPEAK UP) training
	35	- participated in Eat-Sleep-Console (ESC) training (14 have launched ESC in their centers)
	21	- received reports on Severe Maternal Morbidity for women with opioid use disorder (OUD) and participated in PNQIN webinars
	31	- participated in AIM OUD bundle
	24	- participated in AIM Obstetric Hemorrhage bundle
Personal Responsibility Education Program (PREP)		children:
	72	- middle school ages (ages <15)
	171	- adolescents (ages 15-19)
	8	- young adults (ages 20-24)
PRAMS Survey	2,230	infants (ages 2-6 months)
	2,230	other individuals: postpartum women (representative sample of 2021 resident births)
Primary Violence Prevention Program		children (ages 10-24):
	2,776	- direct programming/group sessions
	12,192	- community events/social media
Rape Crisis Centers (including the Spanish-language hotline Llámanos)		Individual-level services:
	8,541	- calls to RCC and Llámanos hotline (all ages)
	2,925	- new rape crisis counseling and advocacy clients (all ages; some included in hotline call count above)
	21,134 ²	- hours spent providing service to individual rape crisis counseling and advocacy clients
		Prevention, outreach, & awareness-building activities:
	7,030	- child participants in educational sessions
	2,963	- adult participants in professional education sessions
	12,802	- adult participants in educational sessions
Safe Spaces for LGBTQ Youth		children (ages 10-24):
	1,699	- direct programming/group sessions
	12,746	- street outreach/community events/social media

² This number is an undercount. Due to staff turnover, one agency did not report hours spent providing services.

Attachment 1 Table
Massachusetts Program Service Numbers by MCH Categories, FY22

School-Based Health Centers	9	Infants (<1 year)
	11,129	children (ages 1 - 22)
	2,579	children with SHCN (included in total above)
School Health Services – Core	992,338	children (includes 911,529 students in public schools and 80,809 in non-public schools)
		others reached:
	398	- cities and towns receive consultation on health services
	655	- non-public schools
	3,000	- health professionals (education): 2,500 school nurses and 500 school physicians
School Health Services – Comprehensive		children with SHCN (some children in both of the following categories):
	36,176	- children with Individual Health Care Plans
	193,379	- other children with diagnosed SHCN
	520,592	children (students in public and non-public school systems with comprehensive programs)
		others reached:
	136	- public school systems with comprehensive programs
	7	- regional advisor schools
	35	- non-public schools with comprehensive programs
Sexual and Reproductive Health Program	3,848	pregnant women
	32,836	children and adolescents (up to age 24)
	48,686	other individuals (women and men over age > 24)
